

Helax consists of a team of highly qualified specialists in the field of Medical Computing.

AB Helax is an innovative expert company entirely dedicated to computer aided solutions in oncology.

Close ties with Uppsala University and its Data Center give Helax access to unique expertise in important areas, such as database management, ergonomic design and physical-mathematical modelling, as well as an excellent recruiting base for qualified staff.

Helax is sensitive to the needs of the user and has literally incorporated the user into the development program.

Products are marketed directly by Helax in Scandinavia and through carefully selected distributors in other countries in order to ensure competent local support.

Helax has been appropriately financed by its major share-holder 3K Holding. Financing support also comes from the Swedish Industrial Fund and the Swedish County Fund for the Procurement of Technology and Product Development (LFTP).

A scientific advisory board supports Helax with information on trends in the research field and the market needs in Radiation Oncology. The board members are:

Jerzy Einhorn M.D, Ph.D,
Professor of Oncology, (Chairman of the board.)
Head of the Oncology Department, Radiumhemmet, Stockholm

Bo Littbrand M.D, Ph.D,
Professor of Oncology, Head of the Oncology Department,
Umeå University Hospital

Anders Hemmingsson, M.D, Ph.D,
Professor of Diagnostic Experimental Radiology,
Head of the Section of Magnetic Resonance Imaging,
Uppsala University Hospital

Hans Svensson, Ph.D,
Professor of Radiation Physics, Head of the Department
of Radiation Physics, Umeå University Hospital

Bo Jung, Ph.D,
Head of the Department of Radiation Physics,
Uppsala University Hospital

Torsten Landberg, M.D, Ph.D,
Head of the Oncology Department, Malmö University Hospital
